

I have heard that the FCC is considering expanding the service of LPFM broadcasts. This concerns me because it would interfere with or supercede the access that K-LOVE (an Evangelical Christian Listener Supported station) has for its translators.

I am a supporter to and listener of K-LOVE, as are many in my community here in suburban San Diego. I am very confident that the positive and encouraging messages and music broadcast by K-LOVE has had a wonderful effect on my community. I can safely assert that the public interest has been served by improving the lives of the citizens who live in this vicinity.

I ask that you please do not allow any new broadcasting policy to interfere with K-LOVE's current access.

Thank you,  
Fred Taylor
